

PENBOOK

Press Kit v4.1

Why we built Penbook

Penbook's customers asked for an iPhone version from almost the day we launched, but it took us until now to understand what Penbook on iPhone really meant.

Simply viewing iPad-created notes on a smaller screen wasn't going to be enough. The iPhone version needed to stand on its own – we wanted customers to love it even if they didn't own an iPad.

After months of beta testing, we're releasing our best efforts in Penbook 4.1. It's the same Penbook as on the iPad. It's just fun-sized.
